

## Plan Share

Traffic Management add-on to support digital submission of TM plans and TTRO applications.

### Digitising the paper trail

Plan Share add-on extends the capabilities of Traffic Management module to support digital submission of traffic management plans and TTRO applications. Eliminating the need for emails and separate documents, traffic management plans can be passed directly from works promoter to highway authority through the one.network platform.

Plan Share enables traffic management plans to be handed off from a highways or utility contractor to the highway authority. TM plan

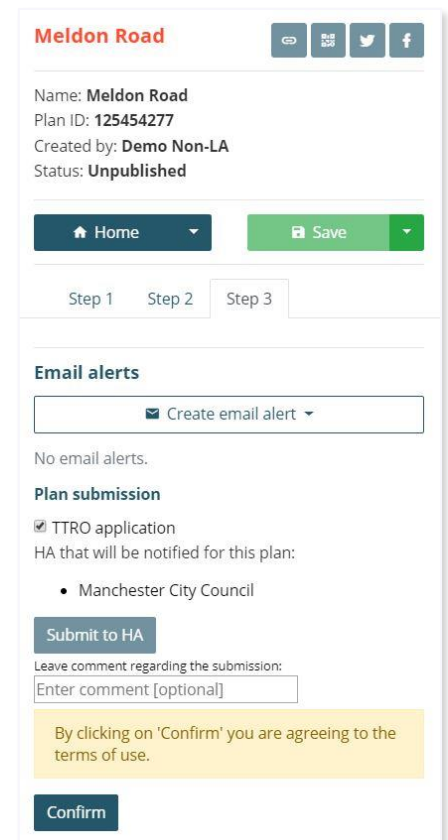

submissions can be optionally accompanied by a TTRO application. Once accepted, plans can then be published to the one.network public map eliminating the need to double key information.

TTRO applications can be digitally approved and the Order paperwork generated and issued with a minimum of manual intervention.

### Features & benefits

- Streamlined end-to-end TM plan process reducing hand-offs and double keying.
- Greater accountability and transparency through digital TTRO approvals process.
- Reduction in rejected TM plans and penalties.

If you would like to know more about the one.network Plan Share add-on and arrange a demo, please contact us.

A screenshot of the Meldon Road traffic management plan submission form. The form displays the plan name 'Meldon Road', Plan ID '125454277', and status 'Unpublished'. It includes a progress bar with 'Step 1', 'Step 2', and 'Step 3'. There is an 'Email alerts' section with a 'Create email alert' button. The 'Plan submission' section has a checked 'TTRO application' box and a list of notified highway authorities, including 'Manchester City Council'. A 'Submit to HA' button is present. At the bottom, there is a 'Leave comment regarding the submission:' field and a 'Confirm' button. A yellow box contains the text: 'By clicking on 'Confirm' you are agreeing to the terms of use.'
